Kinds of Protection

Patents of Invention	Granted for a term of 20 years from submission date
Supplementary Protection Certificates	Extensions of up to five years for pharmaceutical patents

Convention & Treaty Membership

Patent Cooperation Treaty	30.04.1978
European Patent Convention	07.10.1977
Signatory of:	Paris Convention (Stockholm wording) Budapest Treaty World Intellectual Property Organization

Filing for Patents

As of 13.11.1978, chemical, pharmaceutical and food products became patentable in addition to their processes of manufacture.

Applications may be filed in French or German, by the inventor or his assignee. If the assignee applies, assignment is required.

Under *the International Convention* applications claiming priority must be filed within 12 months of the earliest filing in a Convention country. The number and filing date of the basic application must be given but a certified copy is not required. Priority may be claimed within two months of filing in Luxembourg. Under the *European Patent Convention*, a European patent confers the same rights as a national patent from the date of publication of notice of its grant. Under the PCT, an international application designating Luxembourg has the effect of a national application as of the international filing date.

Applications are not subject to examination as to novelty. After the completed application is received the patent is granted at the end of two months.

An extract of the granted patent is published in the appendix of official gazette. Although printed copies are not available, the specifications will be open for viewing by the public, and photocopies are obtainable once the patent has been granted. Upon payment of a fee, applications may be kept secret for periods of six, 12 or 18 months.

There is no provision for opposition.
