WHAT IS WEB OF SCIENCE?
Search over 12,000 journals and 120,000 conference proceedings across the sciences, social sciences, and arts and humanities to find the high quality research most relevant to your area of interest. Link between relevant research using the cited references and explore the subject connections between articles that are established by the expert researchers working in your field.

GENERAL SEARCH
Search
Combine words and phrases to search across the source records in the Web of Science.

Select AND, OR, NOT to change the relationship between search fields.

Add another search field

Select Your Search Field
Use the drop down to select your search field. Search by Topic, Author, Publication Name, Funding Agency, or ResearcherID Number.

Change your search settings
Change your file depth, select which indexes you want to search, and turn Lemmatization off.

Customize Your Experience
- Save and manage your references online with EndNote Web—fully available and fully integrated.
- Search and tag searches
- Choose your start page
- Want to know more?

My ResearcherID
- What is ResearcherID?
- ResearcherID numbers are now exchangeable from within Web of Science.
Search Operators

Use **AND** to find records containing all terms

Use **OR** to find records containing any of the terms

Use **NOT** to exclude records containing certain words from your search

Use **NEAR/n** to find records containing all terms within a certain number of words (n) of each other (stress NEAR/3 sleep)

Use **SAME** in an Address search to find terms in the same line of the address (Tulane SAME Chem)

Stemming, Stop Words, and Spelling Variants

All words are searched (no Stop Words)

British/English spellings are searched automatically (search behavior to find both behavior and behaviour)

Lemmatization automatically helps find variations by stemming for plurals (even complex plurals like tooth/teeth) and searching different verb tenses (run/running) and degrees of comparison (big finds bigger and biggest). Lemmatization can be turned off by enclosing terms in quotation marks.

Wild Card Characters

Use truncation for more control of the retrieval of plurals and variant spellings with Lemmatization turned off.

* = zero to many characters

? = one character

$ = zero or one character

Phrase searching

To search exact phrases in Topic or Title searches, enclose a phrase in quotation marks.

For example, the query "energy conservation" finds records containing the exact phrase energy conservation.

Parentheses

Use parentheses to group compound Boolean statements. For example:

(river or stream or pond) and ("waste water" or pollution)

Author Name

Enter the last name first, followed by a space and up to five initials.

Use truncation and search alternative spelling to find name variants:

Driscoll C* finds Driscoll C, Driscoll CM, Driscoll Charles, and so on.

Driscoll finds all authors with the last name Driscoll

De la Cruz f* OR Delacruz f* finds Delacruz FM, De La Cruz FM, and so on.
FULL RECORD

Titles
Full titles are indexed and searchable.

Authors
All authors are indexed. Search using last name and initials (e.g. garfield e*)

Cited Reference
Click on the Cited Reference number to move to the Cited Reference view of this record.

Abstract
All abstracts are indexed as provided by the journal (1991 to present).

Author Keywords and KeyWords Plus
Author Keywords are indexed and searchable. KeyWords Plus are words and phrases harvested from the titles of the cited articles.

Addresses
All author addresses are indexed and searchable. Reprint author e-mail addresses are listed when available. Common address terms will be truncated (Univ, Coll, Hosp, etc.).

Funding Information
Funding agency, grant numbers, and the funding acknowledgement text is searchable (2008 to present).

ResearcherID
ResearcherIDs are searchable and displayed when available. ResearcherIDs are harvested from public profiles at www.researcherid.com.

Times Cited Counts
Times cited counts for the Web of Science™ (all editions) and Web of Knowledge™ (including Web of Science, Biosis Citation Index, and Chinese Science Citation Database) are displayed on each record. Counts reflect all correct citations and are not limited by your subscription.
CITED REFERENCES

All cited references are indexed and searchable via Cited Reference Search. Click the “References” link on the full record to move to the cited reference view.

Related Records
Click Related Records to find other articles that have cited the same works.

Click the article title to move to a full record.

Unlinked References
Reference that are not linked to full records will display in plain text and include:
- Citations to documents not indexed in Web of Science
- Citations to Journal Articles outside of your subscription year
- Citation variants

Cited References will display current times cited count in the Web of Science and links to full text when available.

SEARCH RESULTS SUMMARY

Sort results
by publication date (default), times cited, source or first author name.

Click the article title
to move to the full record. Links to full-text may also be available (subscription required).

Refine your results
Use Refine to mine your full set of results to find the top 100 Subject Categories, Source Titles, Publication Years, Authors, or Funding Agencies.

Output search results
Export to bibliographic management tools like EndNote®, EndNote® Web, or Reference Manager®. Or save as text, email, or add up to 5,000 records to your temporary Marked List.
CITED REFERENCE SEARCH

Step One
Search by Cited Author, Cited Work, Cited Year, Volume, Issue, or Page
Use the Journal Abbreviations List for help with abbreviations

Step Two
Select the references, including variants, to include in your search, then click “Finish Search” to display your search results.

Search Tips:
• Use truncation on cited author and cited work.
• Look for variants (sometimes papers are cited incorrectly) before finishing your search.
• The “Citing Articles” count reflects citations from all years and all editions of the Web of Science – even those years and editions you don’t subscribe to.
• All cited references are indexed and searchable, including references to books, patents, government documents, etc.
• Secondary cited authors, full source titles, and non-standard source abbreviations are automatically searched across all source records in the Web of Knowledge. Keep in mind that a search of this sort may only return partial results.
CITATION MAPPING

Citation map
Click the button to create a citation map. A citation map will allow you to explore up to two generations of backward and forward citations.

Change the appearance of your map by adjusting the color, order, and text displayed on each node.

Navigate in your map
Click and drag a node to move your map. Roll over a node to display additional publication information. The panels at the bottom of your map display an overview of your selected node and a list of all the records in the map.

CITATION REPORTS

Create a citation report for search results sets with fewer than 10,000 results. Click the link at the top right of a results summary page, or create a citation report from the Marked List.

Citation Reports can provide useful productivity and performance metrics for a set of results:
- publications per year
- citations per year
- H-index (N records with at least N citations)
- Total Citations for all documents
- Average cites per item
- Number of unique citing articles
PERSONALIZE

Create a Web of Knowledge Profile to
• Save searches
• Create Search Alerts
• Create Citation Alerts
• Establish an Endnote Web Library
• Create a ResearcherID profile

Click “Sign In” to register for a Web of Knowledge Profile
Click “Search History” to view your entire search history.

Click “My Citation Alerts” or “My Saved Searches” to manage your searches and alerts*
Run any saved search
Renew alerts (24 weeks for Search Alerts, one year for Citation Alerts.)
Change your alert settings
Set an RSS Feed
*Search Alerts will be based on the last query in your search history and will remain active for 24 weeks. You will be notified two weeks before an alert expires. Expired alerts will remain in your profile as saved searches until you delete.

MANAGE RESULTS

EndNote Web
Save up to 10,000 references in your personal EndNote Web library. With EndNote Web you can collect references from online databases and library catalogs from around the world. References imported from the Web of Knowledge will remain marked with an EndNote Web icon for as long as the record is in your library. Use EndNote Web’s powerful Cite While You Write tools to add references and format bibliographies in documents you are writing. Once you have created an EndNote Web library you can access it at any time, either from your Web of Knowledge profile or by going to www.myendnoteweb.com and entering your Web of Knowledge User ID and Password. EndNote Web can also be fully integrated with the EndNote resource.

Share
Share your reference groups with any EndNote Web User

Organize
Use “Groups” to organize your library.

Collect
Go to “Collect” to start searching Library Catalogs from around the world.
ResearcherID

ResearcherID is your free, public online space to establish a unique ResearcherID number and create a personal profile. Your ResearcherID profile can include information about your institutional affiliations, research interests, and a list of your publications. Publication information from the Web of Science will have live citation information (updated weekly) and include direct links back to the source record. Once you have added your publications, to your ResearcherID profile, your unique ResearcherID number will be automatically associated with your publications in the Web of Science, creating a direct link from the Web of Science record to your ResearcherID profile.

Click the “Citation Metrics” link to view citation metrics like the H-index and average citations per record for the records included in the ResearcherID profile.
